

Common Instrument Suite-Educator

PEAR Educator Assessments

The Common Instrument Suite Educator Survey (CIS-E) is a retrospective self-report survey designed to capture the unique qualities of STEM programs and the practitioners who lead them. Developed to complement both the Common Instrument Suite-Student (CIS-S) and the Dimensions of Success Observation Tool (DoS), the CIS-E enables programs to capture key information about who is leading STEM activities, educators' levels of support, and perceived efficacy in delivering STEM content. The survey was designed for any in- and out-of-school time staff leading or co-leading STEM activities.

CIS-E Measures:

Program & Educator Demographics	<h3 style="margin: 0;">Benefits</h3> <ul style="list-style-type: none"> ✓ Gather information from multiple sources: Use the CIS-E as a standalone tool or alongside the CIS-Student and/or Dimensions of Success Observation Tool to create a holistic picture of the quality and impact of your programming. ✓ Centralized data reporting: PEAR presents your program's data in our dynamic, online data platform. Educator data can be presented in its own dashboard or alongside your program's CIS-S and/or DoS data.
Educators' STEM confidence & perceptions of program quality	
Educators' perceptions of students' confidence and proficiency in STEM and 21st century skills
